13/02/2017	Richard Kelsall	1	I've been a patient at Worden Medical all my life. Getting an appointment with the midwife was quick and she was lovely. However, trying to get an appointment with my GP Dr Warner is a nightmare. Only releasing appointments every 2 days! Even when I have stated I have stopped taking my medication (antidepressants) for the safety of my precious miracle (baby) I am still unable to see my doctor. So after this last week I probably won't recommend Worden Medical Centre to friends and family unless the appointment system changes.
